

SAI GANESH CHILAKALA

Senior Full Stack Developer (MERN) | React.js | Next.js | Node.js | TypeScript

Hyderabad, India | +91 6301739686 | ganeshchilakala11@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Full Stack MERN Developer with 4.8+ years of experience designing, developing, and maintaining scalable enterprise applications using React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, and PostgreSQL. Proven track record in building modular frontend architectures, robust REST APIs, AI-powered feature integrations using OpenAI APIs, state management optimization, microservices integration, and delivering high-performance responsive web products in Agile environments.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Zustand, HTML5, CSS3, Tailwind CSS, Material UI, Micro-frontends.
Backend:	Node.js, Express.js, RESTful APIs, GraphQL, JWT Auth, Custom Middleware, Rate Limiting, Redis Caching, OpenAI API Integration.
Databases:	PostgreSQL, MongoDB, SQL, Mongoose, Aggregation Pipelines, Query Optimization & Indexing.
Testing & Perf:	Jest, React Testing Library, Code Splitting, Lazy Loading, Memoization, Web Vitals, Bundle Optimization.
Tools & DevOps:	Git, GitHub, Azure DevOps, Jira, Postman, CI/CD Pipelines, Docker Basics.

PROFESSIONAL EXPERIENCE

Angular Minds — Senior Software Developer

Dec 2021 – Present | Pune / Remote

- Designed and developed 50+ reusable, accessible React components with TypeScript and Material UI, standardizing UI architecture and accelerating feature rollout by 25% across multiple web platforms.
- Engineered complex enterprise analytics dashboards handling 10K+ live records using React, TypeScript, Zustand, and virtualized tables to maintain smooth 60fps frame rates.
- Architected and optimized full-stack backend services in Node.js/Express, integrating Redis caching layers and PostgreSQL query indexing to lower API latency by 35%.
- Optimized frontend client rendering, network payload sizes, and bundle splitting, achieving a ~30% improvement in page load speeds and overall Core Web Vitals.
- Implemented secure authentication systems utilizing OAuth2, JWT with HTTP-only cookies, role-based access control (RBAC), and custom rate-limiting middleware.
- Mentored junior developers, spearheaded code reviews, and integrated Jest/RTL automated testing to boost overall code coverage to 80%+.

KEY PROJECTS

Universal Music Group - Royalty Management Platform

- Developed high-throughput enterprise dashboards for royalty distribution calculations, statement analytics, and multi-currency reporting.
- Built interactive data visualizations and financial charts using Recharts and Chart.js integrated with PostgreSQL backend queries for rapid rendering.
- Architected global application state using Zustand, reducing unnecessary re-renders across multi-step wizard forms.

Tech Stack: React.js, TypeScript, Zustand, Node.js, PostgreSQL, SQL, Recharts, Express.js, Material UI

Career.io / Resume.io - Resume Builder Platform

- Architected dynamic, real-time resume editor features with custom layout customization, drag-and-drop reordering, and instant PDF rendering.
- Integrated OpenAI APIs (GPT-4) to power intelligent resume content auto-generation, bullet point polish, and ATS keyword optimization suggestions.
- Streamlined client state management using Redux Toolkit to maintain seamless editor responsiveness across multi-section forms.

Tech Stack: React.js, TypeScript, Redux Toolkit, OpenAI API, Node.js, Express.js, Tailwind CSS

Parental Control Dashboard

- Built a responsive administration platform in React.js and TypeScript for configuring device permissions, screen time policies, and web category filters.
- Implemented localization (i18n), accessible WCAG 2.1 UI standards, and real-time activity telemetry updates via RESTful API polling.

Tech Stack: React.js, TypeScript, Redux Toolkit, Node.js, REST APIs, Tailwind CSS

ACHIEVEMENTS

- **Performance Benchmark:** Reduced enterprise application load times by 30% through advanced bundle optimization and backend caching.
- **AI Capabilities:** Successfully integrated OpenAI APIs to build automated content enhancement tools used by thousands of daily users.
- **Component Library:** Built a centralized design system & React component library, standardizing code quality across 4 engineering teams.

EDUCATION

Bachelor of Technology (B.Tech) - Electrical & Electronics Engineering	Graduated: 2021
QIS College of Engineering & Technology, JNTU Kakinada
